Get Involved : Very often avid readers and knowledge gatherers treat their data-base in compartments; this workshop will break the segregation and show the same data under a new light. Participants will go from intensive reading, watching Films, Art contemplation, observing Architecture to identifying Lateral and Inter-disciplinary connections. This exercise is a trigger for every teacher's brain. The study is highly applicable in areas like:

- Formulating an inter-disciplinary project brief,
- Evolving any form of concept,
- Guiding a pre-thesis enquiry and/or
- Guiding a research.

At a personal level the individual will be better facilitated to take up their own research.
