ABSTRACT :

Streets are the driving force of urban environments, serving as critical public spaces that **encourage community interaction, social connection, and economic vitality**. However, the design and planning of streets often prioritize vehicular traffic over pedestrian safety, accessibility, and community needs. This program seeks to address this imbalance by exploring the intersection of design, safety, and community in street planning. Through a combination of lectures, case studies, group exercises, and site visits, participants will gain a deeper understanding of the principles and practices of designing streets as public spaces.

OBJECTIVES :

- Understand the importance of streets as public spaces
- Learning sustainable mobility principles
- Learn principles of designing streets for people
- Analyze safety and accessibility in street and junction design
- Understanding the demand / need for parking and hawkers
- Explore community-led design initiatives
- Develop skills in designing streets as public spaces
- Foster collaboration and knowledge-sharing
- Inspire innovation and creativity in street design
