Webinar series on 70 years of Indian Architecture
QUADRANTS'2021
Vanguards of Indian Architecture

Preamble

The last one year has put a lot of emphasis on the “self-sufficient” initiatives and discerned a need to discover the identity of Indian architectural fraternity. This series is focused on the quantum leaps of Indian post-independence architecture, through the lens of both professionals and academicians. The lessons learnt will help in identification and documentation of parameters that influenced the architectural initiatives in India over the last 70 years. We strive to discover the “link to Indian Architecture, post-independence history”, through a direct interaction with the trailblazers.

The series is aimed to accentuate the recognition of Indian architecture fraternity and their credo along the four quadrants of India through a series of four Chapters.

CHAPTER 4: 2000-2020
Globalisation to Inclusiveness
