

Integrating Sustainable Design Approaches in Architectural Education

Significance/ preamble:

The success of sustainability in design and in the built environment relies on how educational institutions respond to the ideas generated as a result of widespread interest in sustainable development. If sustainability is to become an essential aspect of society and economical development then it has to become an essential part of education. It provides an ability to do architectural design to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, and sustainability. The four day program will address the incorporation of sustainability in education, practice, possible research opportunities and industrial collaborations.

Registration Process

Teachers/architects who wish to register for the training program may do so by filling up the registration form. Registration fees: Rs. 3000/- (Rupees three thousand only).
